

CASE REPORT: PAROXYSMAL ATRIAL FIBRILLATION IN A MISSION-ASSIGNED  
ASTRONAUT

P.A. Bauer<sup>1</sup>, J.D. Polk<sup>1</sup>

<sup>1</sup> NASA Johnson Space Center, Houston, TX

This presentation will explore the clinical and administrative conundrums faced by the flight surgeon upon discovering asymptomatic paroxysmal atrial fibrillation seven months prior to scheduled long duration spaceflight. The presenter will discuss the decision-making process as well as the clinical and operational outcomes.
